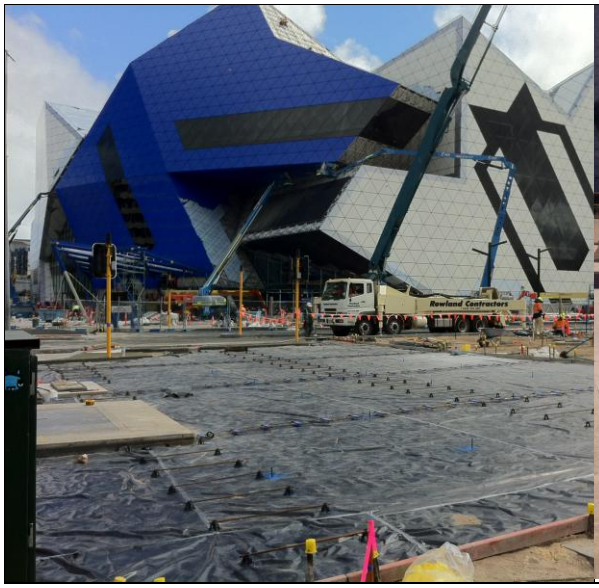
Northbridge Link

November 2011 – January 2012
Client: Downer

Contract Value 2.1 m



Our latest project involved a staged programme that has been completed over the past year. This iconic project is the first stage of works linking Perth's CBD to Northbridge. This project was finished to the highest of quality and all works were performed using our OH&S guidelines and safe work method statements.

- Stage one- building of structural retaining walls. Project managed all, surveying, set out, steel installation, concrete Installation Q&A including our own Inspection and test plan(ITP) form carried out before and after works are completed.
- Stage two- Hardscapes package. Formed and poured all structural planter beds, stairs, water features, rills and pathways. Stone cladding to planters and water feature and tiling to pathways and stairs
